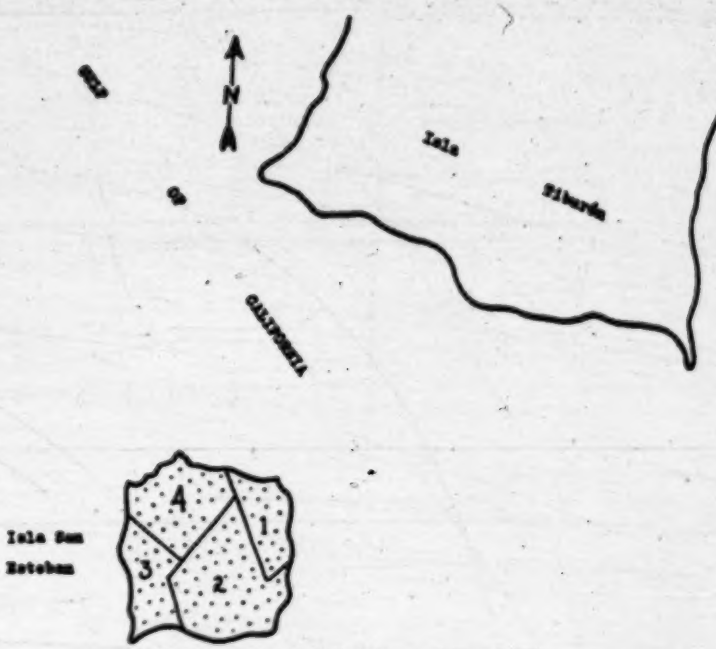

FIG. 5. Subdivisions of Band VI

BAND SOCIAL STRUCTURE

642
621
618
114

The social structure of the bands can be properly understood only in relation to the social structure of their smaller units, the *i?iziitang*. The kin group which resided in and dominated each such subdivision constituted a clan.[5] This group conforms to Murdock's three major specifications for clan designation.[6]

Murdock's first specification states that a kin group, to constitute a clan, must be based explicitly on a unilinear rule of descent. The kin group of each Seri band subdivision was based on patrilineal descent. An individual was closely associated with the group of kinsmen of his subdivision, all of whom were related to him through males only. The father was the head of his household. For example, he assumed leadership in marriage negotiations. Upon his death, the eldest son took his place.

611
592

The second specification states that such a kin group must have residential unity. Seri marriages were exogamous with respect to the subdivision,[7] and the rule of residence was patrilocal. The domicile was set up near the home of the groom's parents.

642 621 618 714 [786] [406]

The third specification states that a kin group, to constitute a clan, must exhibit actual social integration. Murdock stresses the necessity of observing a positive group sentiment, such as would be manifested by organized collective activities or group functions, before the group can be characterized as a clan. An essential feature of this group sentiment is the inclusion of the wife as an integral member of her husband's kin group.

621 618 [628] [622] [701] [583] [406]

This sort of social integration was indeed exhibited by the Seri kin group of each subdivision. It was, in fact, fostered by the isolation brought about by the inhabitants' reservation of hunting and fishing rights for themselves. Tension existed between certain subdivisions and, since there was no chief, the oldest capable male organized and led the fighting force of the clan. In times of need, the members of the group united to give mutual assistance. The groom-to-be could expect material aid from his fellow clan members in the payment of the bride price. Mutual assistance was given in the fulfillment of puberty ceremony and burial obligations. The men cooperated in their hunting and fishing expeditions. The women of the clan, including the in-married spouses, cooperated in the gathering and sharing of food. Everyone could attend the various fiestas. It is said that in the performance of these collective activities, close harmony generally prevailed.

BAND INTERNAL AND EXTERNAL RELATIONS

642 619 578 [648]

The division of the Seri tribe into bands was likely brought about through internal strife. During the period of band history known to the present-day Seri,[8] however, serious skirmishes seem to have been fought predominantly with non-Seri groups.[9]

Band I

642 621 628 578 [721] [648]

Band I internal relations appear to have been relatively peaceful. The inhabitants of subdivisions 1, 2, 3, 4, and 5 were fishermen as well as hunters and gatherers, whereas the people of subdivision 6 preferred to subsist on gathered food and wild game. Also, the members of Band I robbed cattle and horses, which pursuit brought reprisals from the Mexican ranchers. There was apparently considerable social intercourse among the six subdivisions, even to the extent that hunting rights of one were sometimes granted to inhabitants of a neighboring section.

Trouble developed when some members of Band I speared fish within the domain of Band V. Here also bitter fighting broke out, and any semblance of peaceful co-existence between the two groups was destroyed.

the vessel to Guaymas. With the aid of a group of Yaqui, some of these women were said to have been permitted to go to Hermosillo and eventually to return to their home on Tiburon. Others of their group are said to have remained near Guaymas. The women who returned to Tiburon reported that the San Esteban women and children were put aboard another ship which sailed southward.

BANDS I, III, AND IV

642
648
72

As opposition from the Papago and government forces increased, the members of Band I were forced to seek refuge on Tiburon Island. The mainland members of Band III (subdivisions 11 and 12) were also forced, especially during the Encinas Wars, to flee to Tiburon. There the combined forces of Bands I, III, and IV sought to cope with the military expeditions sent out through the years to exterminate them. Tiburon Island is an adverse battlefield for the uninitiated; some expeditions were turned back due to lack of potable water or because of failure to make contact with the enemy in the mountainous terrain. Some expeditions did encounter the Seri, however, and many natives were either killed or captured.

[618]

Through the years, then, these military encounters, along with smallpox and measles epidemics, were responsible for reducing the Seri tribe to a small remnant. The band and clan systems lost their functional relevance as the people continued to live together for mutual protection. Shortly after the turn of the century, the expeditions and raids had practically ceased.

SIGNIFICANCE OF BANDS TODAY

With the dissolution of the band system, the rule of descent shifted from patrilineal to bilateral, and the rule of residence shifted from patrilocal to neolocal.

621
642
178
423
[428]
[583]

Although the substance of the band system is no longer a reality, the concept of land ownership still remains. A young Seri of today may choose to be associated with either the i?iziting of his father or that of his mother. He is said to inherit part ownership of the area. It is recalled by one informant that in former times ownership of a mountain was especially important. Sometimes ownership of a mountain was included as part payment for a bride. Thus a person might 'own' a mountain in a subdivision other than his own.

231
552
178

A custom exists even today whereby a person names his dog after a mountain or other geographical point located in his subdivision. Although the person may re-use the name, each dog so named must be of the same sex as the first.

so named must be of the same sex as the first. The significance of land ownership needs further investigation.

Many of the Seri still prefer, when possible, to live in their chosen band area. Sometimes a person, when he is approaching death, will ask to be taken to his own i?iziiting, where he can die and be buried in the area of his choice.

NOTES

1. Due to printing limitations, stress on Seri words has been omitted, and several orthographic symbol changes have been made for this paper. The phonetic values of the symbols used are the following: p is voiceless labial stop; t is vl. dental stop; k is vl. velar stop; ? is glottal stop; f is vl. labial flat spirant; w is vl. labial grooved-rounded spirant; s is vl. alveolar spirant; z is vl. alveo-palatal spirant; l is vl. lateral spirant; h is vl. velar spirant; x is vl. back velar spirant; m is labial nasal; n is dental nasal; ng is velar nasal; y is palatal semivowel; i is a high close front vowel; e is a low close front vowel; a is a low open central vowel; o is a mid close back vowel.

2. These data were compiled during field trips to the Seri camps during the years 1956-61, the studies being carried out under the auspices of the Summer Institute of Linguistics. The principal informant was R. Herrera T. whose information was checked with and supplemented by nine of the older members of the tribe. I am indebted to my colleague, David Thomas, who read an earlier draft of this paper and made helpful suggestions.

3. 1) W. J. McGee, "The Seri Indians," *Bureau of American Ethnology, Annual Report*, No. 17, Part 1. Washington, 1898. 2) A. L. Kroeber, "The Seri," *Southwest Museum Papers*, No. 6. Los Angeles, 1931. 3) W. B. Griffen, "Notes on Seri Indian Culture, Sonora, Mexico," *Latin American Monograph Series*, No. 10, Gainesville, 1959.

4. It will be noted that between subdivision 3 and 4 on Fig. 3 there is an unnumbered area, the status of which is uncertain.

5. Kroeber states that McGee's concept of Seri maternal lineages crystallized into totemic clans with matron rule seem a fantasy. In Kroeber's opinion, "The Seri may never have had sibs or clans; but the fact that they appear to lack them now is no positive evidence that they were without them three centuries ago. Shifts of residence, contraction of territory, shrinkage of numbers, amalgamation of distinct bands, may well have obliterated much of such social fabric as they once possessed."

Griffen discusses the nature of the former Seri bands and states, "they may have been patrilineal and exogamous. The criteria . . . that Julian Steward has exposited for the formation of exogamous, patrilineal bands . . . are and presumably would have been met formerly in the Seri habitat." Griffen lists other aspects of this type of band which are also verified to some extent by his data. From reading his material, it is obvious that he suspects the existence of clans at some earlier period. He emphasizes the need for further investigation.

6. G. P. Murdock, *Social Structure*, Macmillan Co., New York, 1949.

7. Marriages were usually contracted within the band.

8. As Kroeber points out, their memory likely covers only the latter part of the period of Spanish contacts.

9. The Seri recall nothing of Seri-Pima contacts and little of Seri-Apache relations.

10. The story is related that one day some Seri entered a cave where they found several Papago jugs filled with seeds. Being hungry, the people ate the seeds and left some arrows as token payment. The Seri say that the Papago apparently believed the arrows were intended as an insult. Fighting broke out soon afterward.

11. The Seri concept of the band annihilations is seen to be in contradiction to McGee's statement (p. 132): "Concordantly with their primary characteristic, the Seri have avoided ethnic and demotic union beyond the narrow limits of their own kindred; and even of these they seem to have cast out parts, annihilating the Guaymi and Upanguayma, displacing and nearly destroying the Tepoka, and outlawing individuals and (apparently) small groups."
